Hate Typing cout:: and cs225::?

Useful Shortcut:

```
using std::cout;    // Imports cout into global scope
using std::endl;    // Imports endl into global scope
using cs225::Cube;  // Imports Cube into global scope
```

Strongly Discouraged Shortcut

```
using namespace std;  // Imports all of std:: into
                      // global scope!
                      // ...THOUSANDS of things!
```
