Context in Some Cases Limits Flexibility

What are the two operations?

With context, perhaps…

1. Replace balance of **$5** with balance of **$505**.

2. Replace balance of **$505** with balance of **$498**.

These operations cannot be reordered,
 ° so if completing the first is delayed,
 ° your account may be frozen indefinitely.
                    Not good.
