

What's Better, ML or Humans? (Advantages)

For any given task, **we can compare use of ML with** use of **human employees**.

Advantages of using ML over humans:

- **Capital costs lower.**
- Usage more **flexible** (same chip executes almost any task, unlike skilled humans).
- **Operating costs** much **lower** (and go down rather than up in off-peak hours).
- **Operates 24/7** in absence of failure.
