

# Some Objects Take Time to Identify Correctly

---

“At first it seemed a little speck,  
And then it seemed a mist;  
It moved and moved, and took at last,  
A certain shape, I wist.”

—Samuel Taylor Coleridge,  
*The Rime of the Ancient Mariner*

Sometimes, it **takes time and observations**

- of the motion of an object
- in order **to identify** it.
