

# Record Your Life ... for a Week

---

Imagine that, starting tomorrow,

- you spent a week sitting in a motion capture room
- with 50 camera/speaker devices pointed at you.

An interviewer asks you questions

- about everything you've ever done or felt,
- and you answer candidly.

Your answers are all recorded,

- generating a few Terabytes of data
- (high-resolution, high-speed video!).

Big deal. It fits on a \$100 drive.

Buy two in case one goes bad.
