

The Songthaew Model of Group Transport

In Chiang Mai, Thailand,

- (human-driven) red trucks
- play the role of group taxis.

Here's how it works:

1. Hail one.
2. Give your destination.
3. If they agree, you hop in back.
4. On the way, they pick up and/or drop off others while heading toward your destination.
5. Prices were standardized recently at \$1 for foreigners.
