Actions (2)

- When Pi receives a Request from Pj:

if (state == Held OR voted = true)

      queue Request

else

      send Reply to Pj and set voted = true

- When Pi receives a Release from Pj:

if (queue empty)

      voted = false

else

      dequeue head of queue, say Pk

      Send Reply *only* to Pk

      voted = true
