Example: Transaction

Client code:

```
int transaction_id = openTransaction();
x = server.getFlightAvailability(ABC, 123, date);    // read(ABC, 123, date)
if (x > 0)
    y = server.bookTicket(ABC, 123, date);           // write(ABC, 123, date)
server.putSeat(y, "aisle");                          // write(ABC, 123, date)
// commit entire transaction or abort
closeTransaction(transaction_id);
```
