

# Search

At node  $n$ , send query for key  $k$  to largest successor/finger entry  $\leq k$   
if none exist, send query to  $successor(n)$

At or to the anti-clockwise of  $k$   
(it wraps around the ring)

Say  $m=7$

File `cnn.com/index.html` with  
key **K42** stored here
