

Snitches

- Maps: IPs to racks and DCs. Configured in `cassandra.yaml` config file
- Some options:
 - SimpleSnitch: Unaware of Topology (Rack-unaware)
 - RackInferring: Assumes topology of network by octet of server's IP address
 - `101.201.202.203 = x.<DC octet>.<rack octet>.<node octet>`
 - PropertyFileSnitch: uses a config file
 - EC2Snitch: uses EC2.
 - EC2 Region = DC
 - Availability zone = rack
- Other snitch options available
