Insert

Insert a row entry for new employee Sally

use records   -- Creates a database

```
db.employee.insert({
        name: "Sally",
        salary: 15000,
        designation: "MTS",
        teams: "cluster-management"
        })
```

Also can use save instead of insert
