

## The Web Page Has the Code

---

That's it!

The code is on the web page.

## Time for Another Think-Pair-Share

---

As before, let's do a group exercise in lecture.

The process:

1. I give you a problem.
2. You form groups of 3-4 people.
3. Talk about ways to solve the problem.
4. Once enough of the groups have finished, one group volunteers to share their answer.
5. We go over the group's answer together.

## The Task: Print a Hollow Square of Asterisks

---

Write **C** function `print_square`

- to print a square of asterisks
- filled with spaces
- of a certain size.

```
*****
*   *
*   *
*   *
*****
```

Assumptions and rules:

- Size should be given by caller.
- Define the meaning of the return value (if any).
- Arguments should be checked (you decide how).
- Use loops to print the square.
