

Find the Right Place for the 8

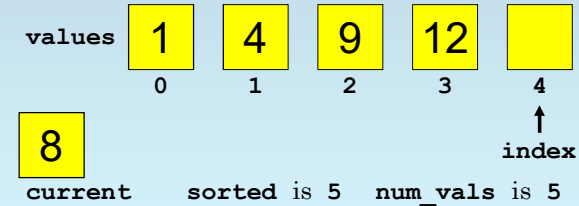

```
for (index = sorted - 1; 0 < index;
    index--) {
```

Is $0 < \text{index}$? Yes!

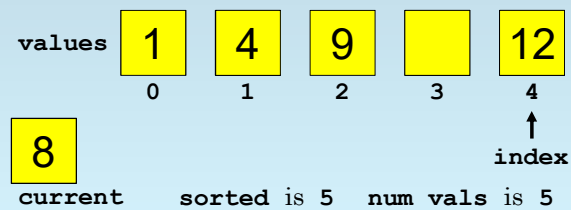

Compare 8 with 12

```
if (current >= values[index - 1]) {
    break; Is 8 >= 12? No.
}
```

Copy 12 from Position 3 to Position 4

```
values[index] = values[index - 1];
```

Update and Test Again

```
for (index = sorted - 1; 0 < index;
    index--) {
```

Is $0 < \text{index}$? Yes.
