

```

void delete_from_list (elt_t** listp, elt_t* e)
{
    while (NULL != *listp) {
        if (e == *listp) { // found it!
            *listp = e->next;
            free (e);
            return;
        }
        listp = &(*listp)->next;
    }
    // could fail here
}

```
