

# Acceleration Preflights

Is it possible for an object to have a positive velocity at the same time as it has a negative acceleration?

88% 1 - Yes

"the object could be slowing down."

12% 2 - No

If the velocity of some object is not zero, can its acceleration ever be zero ?

87% 1 - Yes

"The velocity could be non-zero and constant. A constant velocity has no acceleration.."

13% 2 - No
